Profile

Hello!

My name's Patrik and i'm 24 years old. In 2018-2019, I have been working in The Absolut Company at Åhus for a year after my two months intership. I also loved learning something new thing while working.

I'm currently studying Front End Developer this year at Malmö and this program last for two years.

The first big reason I chose this program to study instead of working was that I wanted to change my environment from industrial work and it was also because of covid-19. I was even recommended to this program by a friend.

My second big reason for choosing this program was that I got used to computer in early years, since I was a primary school student for playing video games and do homework at home with the computer instead of paper and pencil. In high school years I had some courses in html and css.

With all these reasons, i made my very last decision to study.

Employment History

The Absolut Company, part time worker, Åhus

2018 — 2019

Hello!

I have worked in few other area like pack operator, tapp operator, flexiline, handpack and port at Åhus.

I have mostly been in flexi line, hand pack and tapp operator.

Its was enjoying experience i got from there.

Education

Högskoleförberedande examen, Österänggymnasiet, Kristianstad

2015 — 2017

Gymnasieingejör examen, Hässleholm Tekniska Skola, Hässleholm

2017 — 2018

Front End Developer, Medieinstitutet , Malmö

SEPTEMBER 2022 — MAY 2024

I'm currently studying Front End Developer program.

During my first to fifth weeks in school, i have learn about HTML, CSS, GitHub, mamp and source-tree.

From HTML: I have achieve how to create HTML from scratch and learn how to put text in paragraph tag and div boxes. Also how to get image inside a div box while using section headings and making anchor tag to link website/mail/file/location.

From CSS: I have achieve how to use flex, grid for layout placement with color for each boxes, hover for a tag link with animation and using media screen for adapt to desktop, tablet and mobile resolution.

Courses

Front End Developer, Medieinstitutet Malmö

SEPTEMBER 2022 — MAY 2024

Internships

The Absolut Company, Åhus

MARCH 2018 — MAY 2018

During my intership months, I had worked as a part-time worker. I didn't get less work like a real part-time worker.

I had more opportunity to try in other areas while I was in the intership period.

These areas were tap operator, packing operator, flexi line, hand package, port and mixing department.

Competence

I have knowledge of creating an entire website using HTML, CSS and SASS.

I have coded in HTML and it is structure to build entire site from scratch with text inside. While using other elements and tags and boxes for make it out. You can also style your site in HTML.

I have also linked HTML to CSS and SASS. I use grid for placement each boxes, it's one of the best solution because you got less to code, at least for media screen from desktop -> tablets -> phone.

Using SASS gives you many possibilities to save your own colors, fonts, media screen sizes, key-frames and reuse it again for new projects and so on.
